

B-Y ELECTRIC REBATES AND INCENTIVES

Whether you're building a new home, remodeling an existing home, building a new business facility or just looking to upgrade your heating and cooling system, your cooperative has a program designed to help. We also have rebates on lifetime warranty water heaters and electric vehicles!

Electric Heat Rate:

- **2.5 cent per kWh bill credit**
- Electric heating systems are eligible for the electric heat credit on all energy used by the heating system.
- System must have a separate sub-meter to determine usage.
- Heat pump installations are eligible for bill credit year-round with air conditioning function controlled by load management system.

Residential Heating:

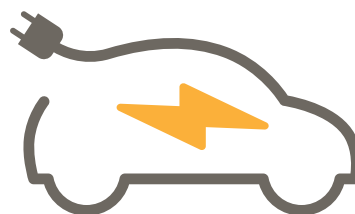

(Replacement incentives offered after 10 years)

- **Electric Heat Pumps - 2 tons or larger.....\$600**
- **Electric Resistance Heat.....\$10 per kW** **NEW**
- **Mini-Split Heat Pump - under 2 tons.....\$300** **NEW**

Electric heating systems must meet the DOE manufacturing standard for HSPF efficiency. DOE standard in 2022 is 8.2.

Commercial Heating:

- **Electric Resistance Heat.....\$10 per kW up to 600 kW**
- **Electric Heat Pumps - 2 tons or larger.....\$50 per ton of heating capacity**

General Contractor Rebate:

\$100 rebate available to the general contractor for installing an all-electric heating system at a new residential dwelling of at least 1200 square feet. **NEW**

Electric Vehicles:

B-Y Electric members are eligible for a \$100 rebate for an electric vehicle that is primarily charged at their B-Y Electric residence and is owned by the member. **NEW**

Lifetime Warranty Water Heaters:

Members who purchase a lifetime warranted electric water heater have the following rebates available:

- Offered on new construction and existing structures.
- \$6.00 per gallon of capacity rebate on a lifetime warranted water heater.
- **50 gallon tank=\$300 85 gallon tank=\$510 100 gallon tank=\$600**
- A load controller must be installed.
- Rebate applies if no rebate has been issued at the location in the previous 10 years.
- Water heater must be at least or greater than 50-gallon capacity.
- \$7.00 per month bill credit with load controller installed, must use 600 kWh per month on the main meter.
- The load controller shuts off the water heater at peak times to reduce the overall demand on our system.
